Air Conditioners

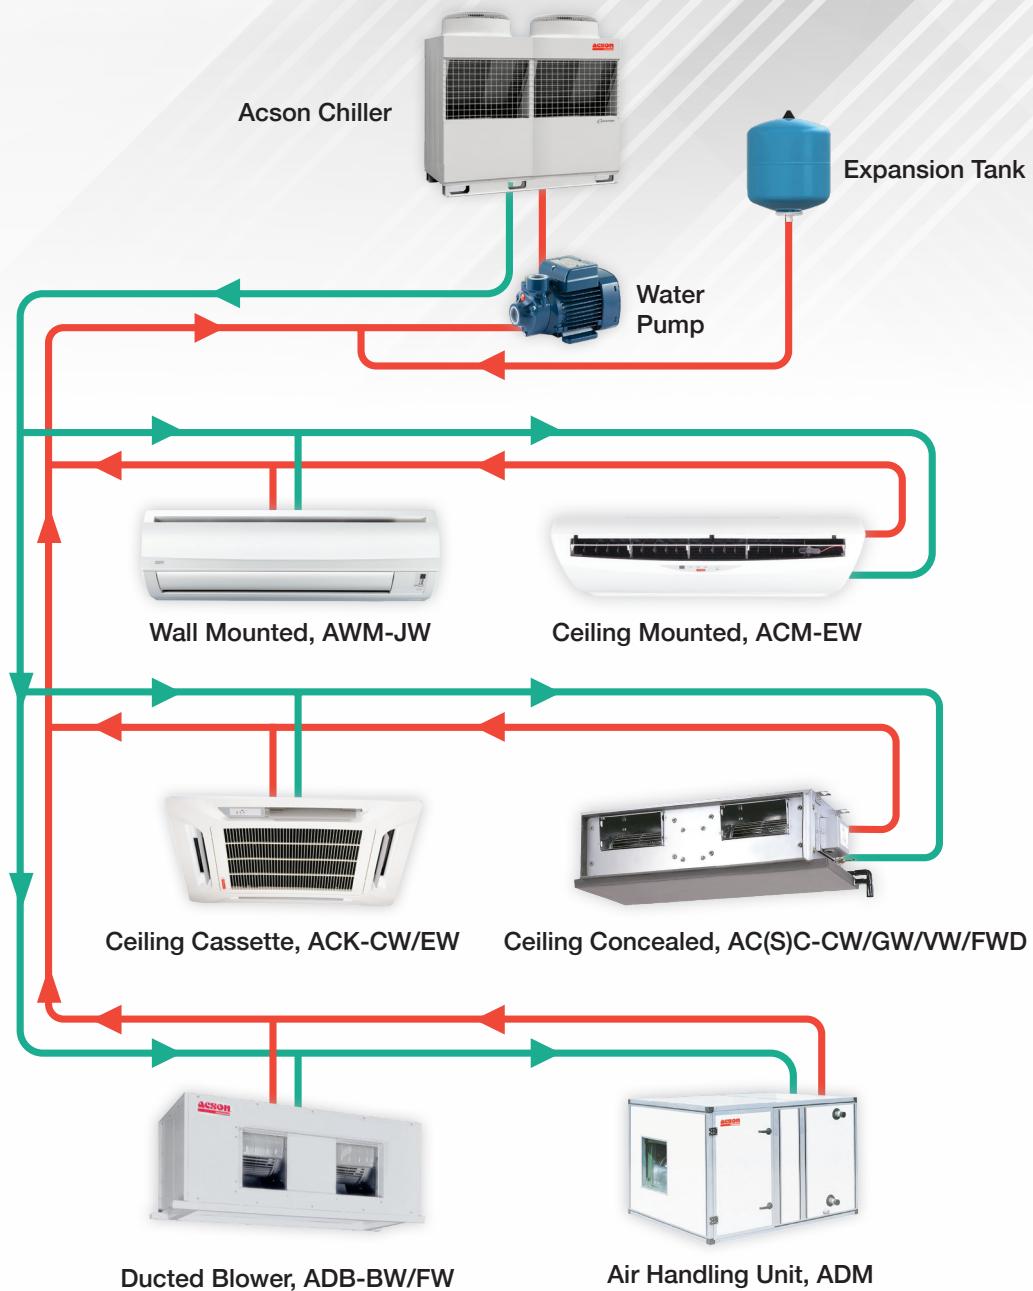

Acson Modular Chiller

Acson Modular Chiller is a versatile air-conditioning line-up that suit the most for commercial and industrial usage. It employs scroll compressors which are powerful and yet compact in size. It is the ideal choice for modern buildings as it can be integrated into the most diverse and inventive structures.

CHILLED WATER SYSTEM

Hydro Technology

Acson Chilled Water System could use air or water to cool down the refrigerant circuit. The cooled refrigerant is then circulated to a Brazed Plate Heat Exchanger (BPHE) where heat exchange will take place to cool down the water or glycol laced water. The chilled water is then circulated to the Fan Coil Unit (FCU) to cool desired place.

*Picture is for illustration purpose only.

Features

Long Piping Applications

Unlike normal Direct Expansion system with constraints in piping design and installation, Acson Chilled Water System allows for long piping application by correct pump sizing. All refrigerant circuit is within the system making it no risk of leakage in building and no oil return issue.

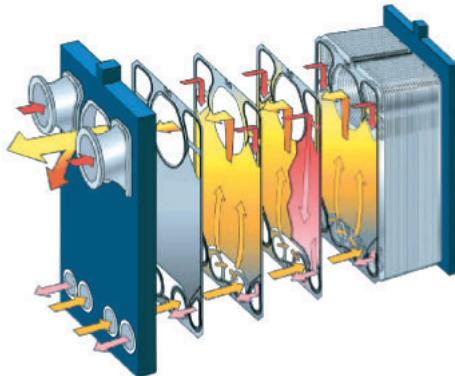

Partial Loading

Acson Chilled Water System is designed with two or more separate refrigerant circuits with multiple compressors. By doing so, the unit has part load capabilities. This will improve the reliability and energy efficiency especially during low loading operations.

- * Mini Chiller - Applicable for A5ACY100-150ER
- ** Modular Chiller - Applicable for A5MAC210D~3360D,
A5MAC230D~3680D, A5MAC230E~3680E,
A5MAC340D~5440D, A5MAC450D~7200D,
A5MWC20~320BR, A5MWC30BR~480BR &
A5MWC40~640BR

Brazed Plate Heat Exchanger

The heat exchanger is made of AISI 316 stainless steel plates closely arranged and brazed together to maximize heat exchange for higher efficiency.

R410A

Environmental friendly R410A refrigerant system with zero Ozone Depletion Potential (ODP) is available upon request.

Time and Cost Saving

As the unit is fully assembled in the factory and pass through a series of stringent quality control and assurance processes, mind is rest assured when installing the system. Refrigerant is also precharged to reduce the hustle of field charging and cost saving.

Compact Size

The Chilled Water System is so compact that it can be integrated perfectly with any architectural design, making it an ideal choice for house, office, restaurant and shop.

Air Cooled Modular Chilled Inverter E-Series (VRA)

Acson is committed to offer the new high efficiency inverter air-cooled modular chiller that meets the challenging need of today's market. With advanced technology, it combines both the benefits of R410A refrigerant and inverter in 1 united body. It is proper designed to provide the best coefficient of performance by option of using variable speed compressor instead of fixed-speed compressor to ensure the end product is compatible with various applications. Air-cooled Modular Chiller Inverter E Series is surely a people oriented solution for the next generation.

Model: A5MAC 230E

Cooling Capacity: 66 kW to 1056 kW

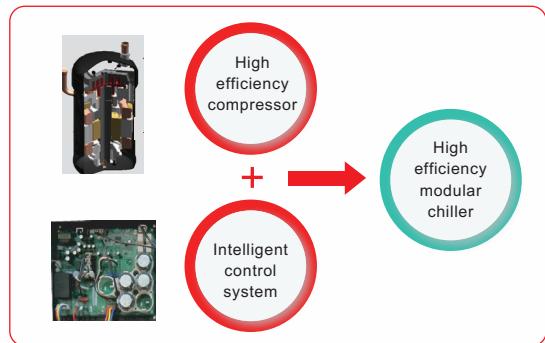

Refrigerant: R410A

Features

Inverter Technology

By advanced DC inverter technology, it provides the outstanding energy efficient performance. The module is equipped with a DC inverter compressor and fan motor, as well as intelligent inverter control system. The inverter driven feature multi speed driven compressors precisely match their output capacity according to load requirement, so that the module is always maintain at optimal energy efficiency operation.

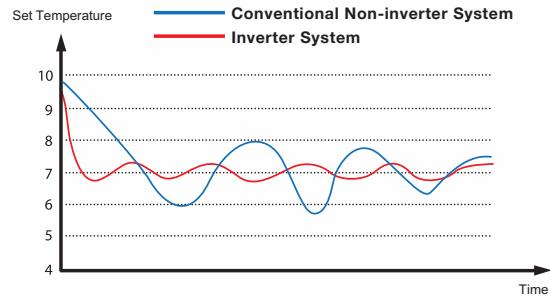

High Part Loading Efficiency

Acson inverter air cooled modular chiller (VRA) excel is part loading has IPLV value of 4.51.

Precise Temperature Control

The unique Inverter keeps room temperature stable by controlling the compressor at variable speed with minimum temperature fluctuation. Thus, each unit auto adaptive to real capacity needs for a high level of comfort.

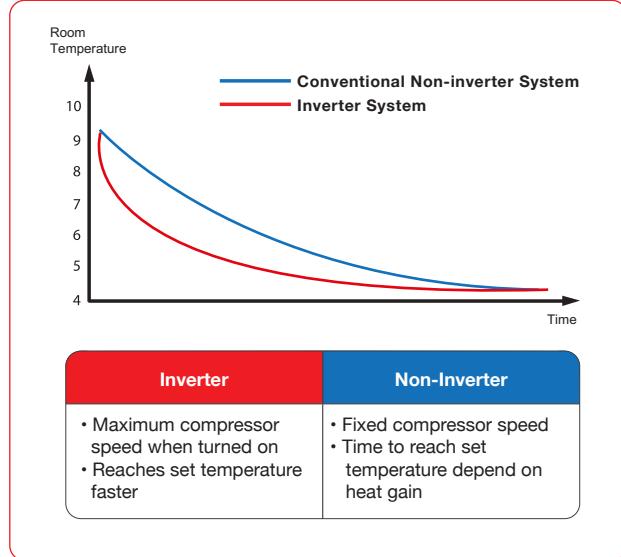

Precise & Stable Temperature Control

Inverter	Non-Inverter
<ul style="list-style-type: none">• Compressor speed changes• Compressor slow down when reaches set temperature	<ul style="list-style-type: none">• Compressor single speed• Temperature falls/rises significantly.

Rapid Cooling

Able to optimize in shorter period of time.

Low Inrush Current

Inverter driven compressor requires lower starting torque which features soft start to ensure a smooth ramp up profile without withdrawing high current. This aspect avoid peak fluctuation that potential to harm sensitive equipment and no need of expensive additional components for power factor correction.

Expandable Capacity

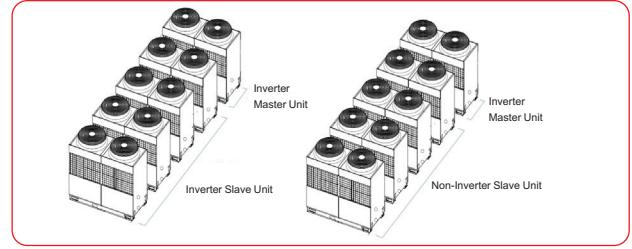

The beauty of modular design feature new levels of unit compact in size and configuration which facilitates flexibility in expands of capacity for building extension by arbitrary combination up to 16 units to cater to additional cooling requirements.

Redundant Operation

Redundancy feature back up capacity and capabilities to continue to run given a component failure. Fault of any unit can be isolated for service and will not affect the normal operation of other units.

Diverse System Solution

*Maximum number of a system is 16 units.
*Non - inverter is D model ranges from A5MAC210, 230, 340 and 450D depends on model.

Relative Humidity Control

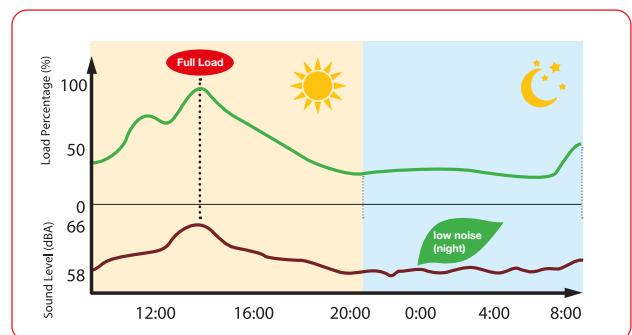

Control of temperature and relative humidity can be achieved precisely by adding accessories such as heating coil and electrical heater.

Supply Fresh Air Regulation

Able to couple with different Air Handling Unit (AHU) which fresh air can be easily introduce from outside and extract stale air to the outside thus improve Indoor Air Quality (IAQ).

Practically Silent Operation

The inverter sound performance introduces sound level as low as 58dBA with respect to conventional unit. At part-load conditions, typical at the night, the inverter device adjust speed variation to have lower sound levels than conventional on-off compressor systems in both running and start-up periods.

Ez-Comm for ModBus Communication

Acson Inverter Air Cooled Modular Chiller has a standard Modbus port that can be easily connect to Building Automation System (BAS). Making centralized control can be easily achieve.

Specifications

							116.4 (256.6)

Arbitrary combination up to 16 modules

Notes:

1. Unit dimension is taken assuming units is stacked front facing the back and with installation clearance.
2. Nominal cooling capacity are based on the conditions below:

Mode		Cooling
Evaporator	Leaving Water Temperature	7°C
Condenser	Ambient Temperature	35°C DB / 24° C WB
Nominal Flow Rate		0.172 m³/h.kW

3. IPLV = COP of 100% LOAD @ 35C AMBIENT x 2.3% + COP of 75% LOAD @ 31.5C AMBIENT x 41.5% + COP in 50% LOAD @ 28.0C AMBIENT x 46.1% + COP IN 25% LOAD @ 24.5C AMBIENT x 10.1.
4. Parameter above is tested under rated voltage of 380V.
5. Water pressure drop includes water pressure drop of both the unit and the strainer.
6. For maximum running current ambient temperature is 43C.
7. Combination above is in series, parameter such as water flowrate vary depend on design.
8. All specifications are subjected to change by the manufacturer without prior notice.

Air Cooled Modular Chiller D Series

Intelligent Control System with Safety Protection

An user friendly intelligent control system is built into the modular chiller. Microchip and large-scaled LCD display are employed to make the control swift and easy. The modular chiller is equipped with a series of safety control including the high/low pressure switch to ensure safe operation .

	AMAC 210D	AMAC 230D	AMAC 340D	AMAC 450D	AMAC 1000D
Intelligent Control System	Port provided for BMS		Built in Modbus		

Low Noise Operation

The specially designed spiral blades ensure smooth air flow, significantly reducing the turbulence and lowering sound level.

Ez-Comm for ModBus Communication

The Ez-Comm is a data converter that coordinates Acson modular chiller unit control system and controls inter-system communications based on the ModBus communication protocol. It automatically converts the internal communication protocol of Acson modular chiller unit into the ModBus communication protocol to ensure that the unit is connected to the BAS system that is based on the ModBus RTU communication protocol and uses the RS485 communication mode.

Note:

A5MAC 340D, A5MAC 450D & A5MAC 1000D ModBus is built-in.
A5MAC 210D & A5MAC 230D is optional.
Please consult us for more details.

							348 (767)

Arbitrary combination up to 16 modules

Notes:

1. Unit dimension is taken assuming units is stacked front facing the back and with installation clearance.
2. Nominal cooling capacity are based on the conditions below:

Mode		Cooling
Evaporator	Leaving Water Temperature	7°C
Condenser	Ambient Temperature	35°C DB / 24°C WB
Nominal Flow Rate		0.172 m³/h.kW

3. Nominal water flow rate and pressure drop is based on series installation method.
4. All specifications are subjected to change by the manufacturer without prior notice.
5. Sound pressure level is measured based on distance from chiller to receiver = 1.0m.

Water Cooled Modular Chilled Series

Model		A5MWC 020BR-320BR	A5MWC 030BR-480BR	A5MWC 040BR-640BR
Cooling Capacity	kW	69 - 1104	101 - 1616 110 - 1760 (High EER Model)	140 - 2240 145 - 2320 (High EER Model)
Refrigerant		R410A		

Features

Modular Design

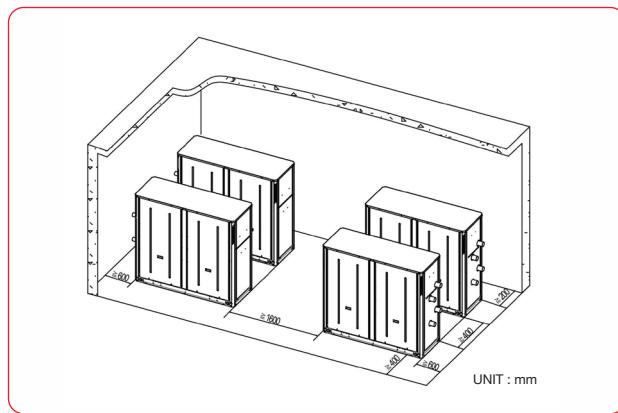

The modular chiller allows for combination of up to 16 base modules unit where each module can be connected to form a much larger system.

Base Module	A5MWC 20BR	A5MWC 30BR	A5MWC 40BR
Modular Chiller B Series	A5MWC 40BR	A5MWC 60BR	A5MWC 80BR
	A5MWC 60BR	A5MWC 90BR	A5MWC 120BR
	A5MWC 80BR	A5MWC 120BR	A5MWC 160BR
	A5MWC 100BR	A5MWC 150BR	A5MWC 200BR
	A5MWC 120BR	A5MWC 180BR	A5MWC 240BR

*Arbitrary combination up to 16 modules

Change Whenever Need

It is unnecessary to fix the central air-conditioning equipment for one time to be certain combination. Instead, other modules and corresponding equipment can be added as required by the growth of the occupants. It helps to save the initial investment and the operation cost.

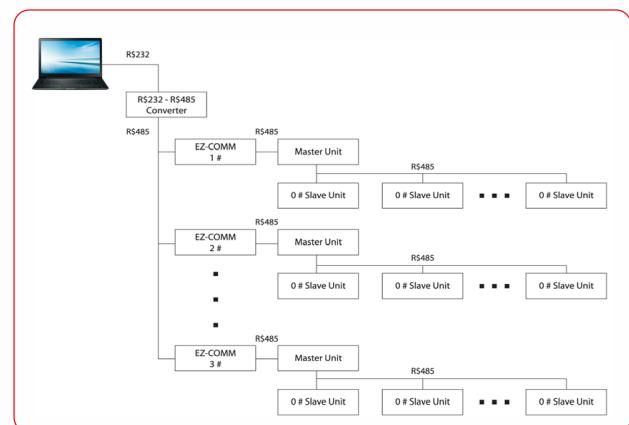

Reliable Operation

The fault of any compressor or the maintenance and care of any unit will not affect the normal operation of other units.

Ez-Comm for ModBus Communication

The Ez-Comm is a data converter that coordinates Acson modular chiller unit control system and controls inter-system communications based on the ModBus communication protocol. It automatically converts the internal communication protocol of Acson modular chiller unit into the ModBus communication protocol to ensure that the unit is connected to the BAS system that is based on the ModBus RTU communication protocol and uses the RS485 communication mode.

Air Cooled Mini Chiller Series

Model				
Cooling capacity	kW	9.4 - 11.40	14.6 - 24.90	28.80 - 40.00

*Picture is for illustration purpose only.

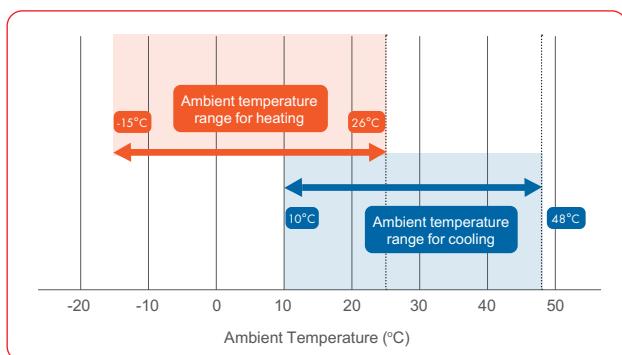

Features

All in One Unit

The mini chiller is fully integrated and equipped with key hydronic components such as expansion tank, water tank, brazed plate heat exchanger and water circulating pump. The all in one concept will ease the job of installation.

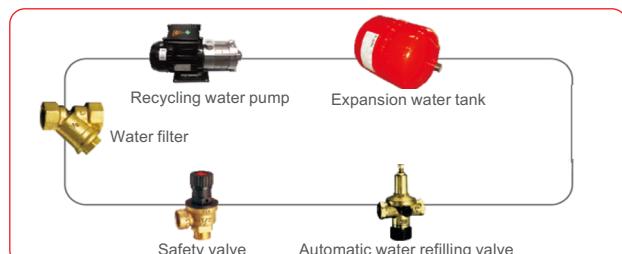

Wide Operating Range

The unit operates normally in the ambient temperature range of -15°C to 48°C and supplies outlet water in the wide temperature range of 5°C to 55°C.

Integrated Design

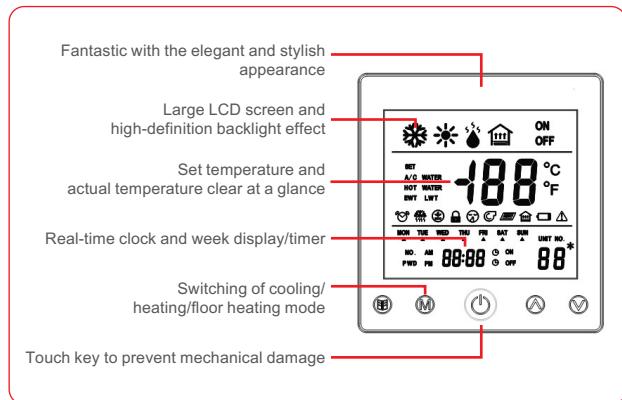

The whole system is provided with a complete set of accessories. Installation can be easily completed by connecting the water pipe to the terminal.

Accessory of the water system	Standard Built-In	Recycling pump, expansion tank
	Supplied accessories	water filter, automatic water refilling valve, safety valve, communication cable, drain joint and PE gasket

Power is Nothing Without Control

An user friendly and versatile wired controller is equipped with every mini chiller

Protection

Anti-Freeze Heater

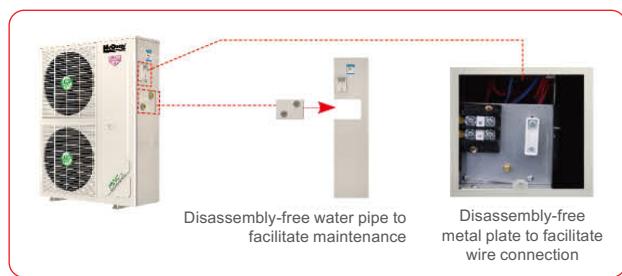

The BPHE (Brazed Plate Heat Exchanger) has a strip heater around it to prevent water freezing

Anti-Freeze Sensor

Signal is sent from the anti-freeze sensor to cut out the compressor if the water temperature becomes too low to prevent BPHE from freezing.

Unique disassembly-free design

The metal plate of the unit and metal plate at the water pipe are separated from each other and hence, the user does not require to remove the water pipe during maintenance. Users need not remove the metal plate during the wire connection process as well.

	Charge	kg (lb)	5.2 (11.5)	8 (17.6)	8.5 (18.7)	9.1 (20.1)

Notes:

1. Unit dimension is taken assuming units is stacked front facing the back and with installation clearance.
2. Unit have built in water pump and expansion tank. However, strainer, safety valve, water filing valve and wired controller need to be install on site.
3. Nominal cooling capacity are based on the conditions below:

Mode		Cooling
Evaporator	Leaving Water Temperature	7°C
Condenser	Ambient Temperature	35°C DB / 24°C WB
Nominal Flow Rate		0.172 m³/h.kW

4. All specifications are subjected to change by the manufacturer without prior notice.

Chilled Water Fan Coil Units Line-up

A wide range of fan coil units ranging from residential use to industrial application is available for different needs. Each model comes with their own unique features and advantages.

The available chilled water fan coil units are:

- Wall Mounted JW
- Ceiling Cassette CW/ EW Series
- Ceiling Mounted EW Series
- Ducted Blower BW Series
- Ducted Blower FW Series
- Ceiling Concealed VW Series
- Ceiling Concealed CW Series
- Ceiling Concealed GW Series
- Ceiling Concealed FWD Series
- Double Skin Ceiling Concealed CW Series

Power is Nothing Without Control

SLM9

The Chilled Water Fan Coil Unit is supplied with SLM9 micro computer thermostat as standard wired controller. This wired controller comes with a LCD screen with every information of the unit easily visible. It is adapted to fan coil and electromechanical valve's control.

*Applicable for certain model

1. SWING Button

Swing at your command or fix the louver at your preferred position.

2. MODE Button

Different Mode for different ambient - Cool, Dry, and Fan.

3. DELAY TIMER Button

Delay the "OFF" timer function by maximum of 2 hour.

4. FAN Button

Control your airflow to Low, Mid, High or Auto to let your unit do the thinking.

5. TIMER Button

Turn on or off the unit automatically with its built in timer. Maximum of 2 ON and 2 OFF timers.

6. LCD Display

Every information on the unit vividly display in LCD screen.

7. TEMPERATURE Button

Set the temperature according to your preferences.

8. SLEEP Button

The sleep mode gradually increase the room temperature to ensure a comfortable and mellow sleeping environment.

9. ON/OFF POWER Button

The Power Button turn the unit ON or OFF.

10. Real Time Clock (RTC)

Set the real time clock.

Notes:

1. Nominal cooling capacity are based on the conditions below:

Mode	Cooling
Entering Air Temperature	27°C DB / 19°C WB
Entering Water Temperature	7°C
Leaving Water Temperature	12°C

2. Sound measurement position is 1.5m below the centre of the unit with 2m length duct at the air discharge outlet and air return inlet.

3. All specifications are subjected to change by the manufacturer without prior notice.

Notes:

1. Nominal cooling capacity are based on the conditions below:

Mode	Cooling
Entering Air Temperature	27°C DB / 19.5°C WB
Entering Water Temperature	7°C
Leaving Water Temperature	12°C

2. Sound pressure measured at 1m in front of the unit and 1m below the vertical center line of the unit and tested in semi anechoic room with background sound pressure level at 11.5dB(A).

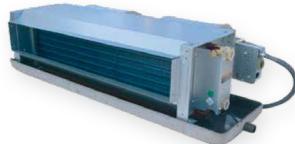

3. Sound pressure level measured in semi-anechoic room with background 11.5 dB(A). 12Pa unit: 1 meter front and 1 meter below the unit, with return air duct; 30/50Pa unit: 1 meter below the unit, with return and supply air duct."

4. ACC-VW series can be equipped with DC motor.

5. All specifications are subjected to change by the manufacturer without prior notice.

Notes:

1. Nominal cooling capacity are based on the conditions below:

Mode	Cooling	
Entering Air Temperature	27°C DB / 19°C WB	
Entering Water Temperature	7°C	
Leaving Water Temperature	12°C	

2. The external static pressure is inclusive of a flat Grade 3 filter contribute a pressure drop of 88 Pa.

3. The unit weight stipulated are net weight, operating weight will increase approximately 20%.

4. The sound pressure level value is estimated and the position is 1 m below and after the supply duct.

5. All specifications are subjected to change by the manufacturer without prior notice.
